

# LEXI

**A Python Based Voice  
Assistance for Linux**

# INTRODUCING LEXI

# INSIGHT

1. **Lexi leverages Python libraries for speech recognition and text-to-speech.**
2. **It provides a user-friendly interface for easy interaction.**
3. **No terminal commands are required!**

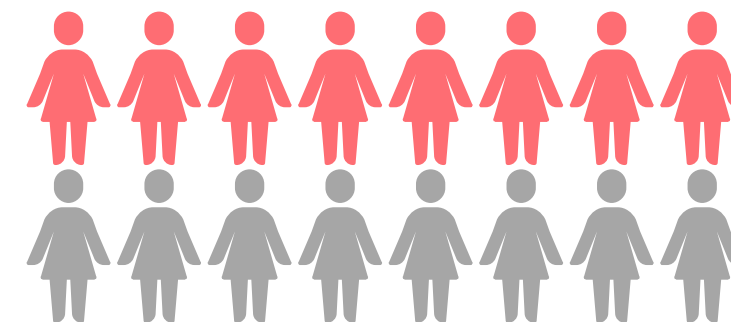

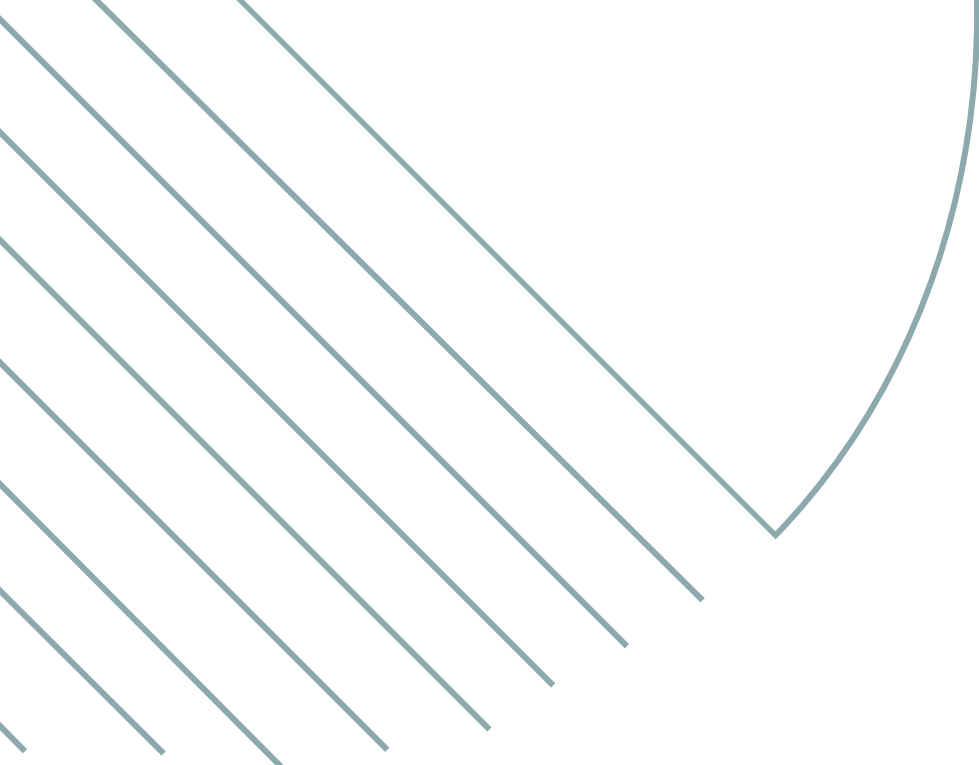

# KEY FUNCTIONALITIES

**Plays music • Enables Bluetooth • Searches the  
web • Opens file explorer (limited) • Provides  
date and time • Shuts down or restarts system •  
Sends emails (limited, requires user input)**

# CHALLENGES

# DEMO

## LET'S SEE LEXI IN ACTION!

# FUTURE IMPLEMENTATIONS

01 - FEATURES UPDATE

02 - OS INTEGRATION

03 - TO OTHER OS
